

Application No.: 09/560,288  
Amendment dated November 5, 2004  
Reply to Office action of October 20, 2004

### **REMARKS/ARGUMENTS**

Consideration of this Amendment After Final Rejection is respectfully requested.

Claims 35, 37-51 remain in the application. The Applicants wish to thank the Examiner for the most helpful suggestions set forth in the Office Action of October 20, 2004.

#### ***Request for Interference***

As will be shown hereafter, at least some of the claims in this application are allowable. Applicants have previously requested that an interference be declared between the claims of this application and United States Patent No. 6,340,369 to Ferree. It is again requested that the claims of this application be put into interference with United States Patent No. 6,340,369 to Ferree, for the reasons previously requested.

#### ***Claim Rejections Under 35 U.S.C. § 112, Paragraph 1***

In paragraph 6, the Examiner rejected Claim 35 for lack of antecedent basis. Claim 35(e) has been amended to overcome this rejection.

In paragraphs 7 and 8, the Examiner suggested amending Claim 35 to include “a method of implanting human intervertebral disc cells into a patient with damaged or diseased intervertebral disc tissue ...”. This amendment to Claims 35 and 39 has been made.

#### ***Claim Rejections Under 35 U.S.C. § 112, Paragraph 2***

In paragraph 9, Claims 42-43, 46 and 47-51 are rejected under 35 U.S.C. § 112, second paragraph as being indefinite.

As suggested by the Examiner, amendments to those claims have been made. Specifically, Claim 47 has been amended to provide proper antecedent basis for “said disc cells” in step (a). In addition, Claims 39, 41 and 48 have been amended to provide consistency of the description “human intervertebral disc cells”. In addition, Claim 46 has been amended as suggested by the Examiner.

There being no further outstanding matters in this case, it is respectfully submitted that the application is ready for allowance and such action is earnestly solicited. If there are any
